The Ohio Clinical Practice Guideline Committee has adopted the Colorado Region’s Headache Management Tool Guideline. When referencing this Guideline, be sure to utilize Ohio’s work process for referrals and telephone contact information.

KPO Formulary discrepancies noted are:

- The following medications are mentioned in the KPCO Treatment Algorithm, but are not on the Commercial Formulary:
  - Naratriptan
  - Sumatriptan nasal spray

- The following medications are mentioned in the KPCO Prophylactic Medications table, but are not on the Commercial Formulary:
  - Metoprolol XL; Metoprolol (IR) is on the Commercial Formulary
  - Propranolol 40mg/5mL solution
  - Divalproex ER tablet

Also, note the OTC dietary supplements mentioned are not covered under the pharmacy benefit, but may be available at a low cash price: Butterbur, Coenzyme Q10, Feverfew and Riboflavin.
